Introduction

Augmented Choirs – Pristine Voices Reimagined

FROM CLASSICAL CHOIRS TO HYBRID TEXTURES

Augmented Choirs bridges centuries of vocal tradition with today's most inventive sound design. Recorded over six years in legendary halls and intimate studios around the world, it captures the nuance, power, and humanity of hundreds of vocalists, then opens the door to bold new sonic possibilities. From delicate whispers to epic tutti chords, Augmented Choirs lets you bring vocal emotion into any genre, in ways both familiar and entirely new.

Discover the perfect blend of pristine, high-quality recordings and creative sound design.

A WORLD OF VOICES

Augmented Choirs is fueled by various sound categories, each with distinct character and creative potential:

- **Classical** – Rich, traditional ensembles with timeless tone
- **Studio** – Modern, tight harmonies ideal for pop and hybrid
- **Georgian / Folk** – Rare Eastern ensembles and interval-based harmonies
- **Solo Vox** – Intimate soloists across genres and styles
- **Synth** – Iconic synths shaping vocal textures from sharp attacks to lush soundscapes
- **Tape** – Specially recreated sounds, re-sampled on tapes, slowed down or speed up

CAPTURED WITH PRECISION

Every recording was captured with obsessive attention to detail. Microphone choices and positioning were optimized for each performance, capturing every nuance, including the natural release stages in our Classical recordings (True Release). Unique articulations, sustained vowels, dynamic swells, and special techniques were recorded to maximize expressive potential, the result is a palette of over 500 vocal sources that can be used pure and unprocessed, or radically transformed.

HYBRID POWER, INFINITE POSSIBILITIES

Augmented Choirs merges UVI's world-class vocal sampling with advanced synthesis to create an instrument that goes far beyond traditional choir libraries. Its 4-layer architecture allows you to mix, morph, and modulate traditional and non-traditional sources, building unique hybrid timbres heard nowhere else. Whether you want subtle human breath in a synth pad, or a cathedral choir layered with vocoders and tape noise, the possibilities are endless.

AUGMENTED ENGINE

At its core is a feature-rich synthesis and modulation environment, with extensive sound design potential and a powerful sequencer that can transform static patches into rhythmic textures, ostinatos, or evolving swells.

- Envelopes, multi-mode filters, & effects per layer
- Built-in sequencer for evolving textures
- Extensive FX rack including send & bus effects

DESIGNED BY EXPERTS

Over 800 presets were handcrafted by UVI's sound design team, each built to inspire and serve as both finished sounds and starting points for exploration. Presets range from traditional choral ensembles and cinematic layers to ethereal pads, rhythmic pulses, vocal textures, and experimental effects. Because all are built on a powerful hybrid engine, even the most traditional starting points can be morphed into something entirely new in seconds.

ONE-OF-A-KIND EXPRESSION

From cinematic scores and pop productions to avant-garde soundscapes, Augmented Choirs offers a spectrum of timbres no other instrument can match. It's the human voice, timeless, emotional, and endlessly transformable, reimagined for the modern composer and producer.

Minimum System Requirements

- Latest version of UVI Workstation or Falcon
- 20GB of disk space

For more information on the installation process, please refer to the document: [Install Guide](#)

User Interface - Main

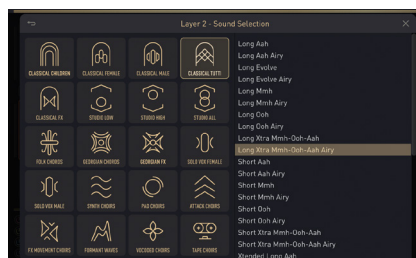

1 Global Controls

- » **Pages**
Change current page: Main, A and B layers, Seq and FX
- » **Layer Level**
Click-drag the yellow arrow to the right of the A or B level meter to change its gain
- » **Master Volume**
Set the global output level with VU

2 Layer Controls (A1, A2, B1, B2)

- » **Power Layer** 
Click to disable the Layer
- » **Layer Crossfader**
Click-drag to morph layer mix 1 and 2
- » **Sound**
Select sounds by browser or by using the [<] [>] arrows

Click the  button to undo selection

Click the [X] button to close the panel

- » **Volume**
Adjust the layer volume
- » **Octave**
Adjust the octave offset
- » **Keyboard Range**
Click-drag or double-click to set the range of notes that each layer will respond to
The left note (e.g. C-2) to set the lowest note of the range
The right note (e.g. G8) to set the highest note of the range

3 Bend

Set the pitchbend range

4 Harmonizer

Add harmony note(s) of the sound according to the following settings:

- » **Power** 
Click to enable the effect
- » **Scale Input**
Scales the input MIDI to selected Scale
- » **Harmony Slots**
Up to five notes of harmonization
[+] - Click-drag the empty slot to add the harmony in range of +/- 24 semitones
[X] - Click to empty the slot
- » **Scale** - Set the scale
- » **Root Key** - Set the locked root key
- » **Root Lock**  - Click to lock the root key
- » **Randomize Harmony** 
- » **Reset All** [X]
Reset all harmony

5 Voices

Set the maximum polyphony of the patch

User Interface - Layer Edit

1 Layer Global

- » **Layer Select** - Change current Layer 1 or 2
- » **Power Layer**  - Click to disable the Layer
- » **Link** - Links Layer 1 and 2 so that changes made on one affect the other as well
- » **Sound** - Select sounds by browser or by using the [◀] [▶] arrows
- » **Sound Commands**  - Click to execute the commands by drop-down menu
Clear - Reset the layer settings
Copy to - Copy the current sound settings to one of the other layers

2 Amp & MIDI

- » **MIDI Mode** - Set the dynamics control mode, Velocity or Modwheel
- » **MIDI Curve**  - Click and drag to adjust the curve of dynamics response
- » **Smooth Filter** - Set the velocity amount of LP 6dB/oct filter for smooth timbre changes
- » **Gain** - Adjust the overall layer level
- » **Pan** - Adjust the layer's stereo pan position
- » **ADSR** - Adjust the layer level over time using an Attack/Decay/Sustain/Release envelope
- » **Attack and Decay Curve**  - Click-drag to adjust the curve of attack and decay/release envelope stages
- » **True Release**  - Enables release samples
- » **Release** - Adjust the release samples level

3 Filter

- » **Power**  - Activate the filter
- » **Mode** - Set the filter mode; Xpander, VCF-20 and Comb. Xpander filter can select between lowpass, bandpass, and highpass filter shapes
- » **Cutoff** - Set the filter cutoff frequency
- » **Q** - Set the filter resonance amount
- » **Drive** - Set the filter drive amount (Xpander)
- » **LP/HP** - Set the filter to high-pass or low-pass mode (VCF-20)
- » **+/-** - Set the filter polarity (Comb)
- » **Depth** - Set the filter depth amount
- » **ADSR** - Typical ADSR envelope for the Filter
- » **Attack and Decay Curve**  - Click-drag to adjust the curve of attack and decay/release envelope stages

4 Pitch & Voicing

- » **Voice Mode** - Set the voice mode between Poly, Poly Portamento, Mono Retrigger, Mono Portamento and Legato
- » **Octave** - Transpose the pitch in octaves
- » **Color** - Shifts color based on adjacent samples
- » **Pitch** - Fine-tune the pitch in cents
- » **Depth** - Set the depth of the pitch envelope
- » **Time** - Set the pitch glide time
- » **Time Curve**  - Click-drag to adjust the curve of the glide time

5 Crossfader

- » **Crossfader** - Click-drag to morph layer mix
- » **Modulation**  - Enable/disable crossfader modulation
- » **Modulation Shape** - Click to select the modulation shape from drop-down menu
- » **Frequency** - Adjust the modulation speed
Host Sync off - Set the speed at Hz
Host Sync on - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Depth** - Adjust the modulation depth
- » **Host Sync**  - Enable/disable the modulation speed sync to host (DAW project) tempo
- » **Invert**  - Invert the modulation direction

6 Layer FX

Click FX tab to access the Layer Effects
 See page 7 for more details

7 Layer Modulators

Click the label at the left to switch the layer Modulators, between LFO 1, LFO 2, Step Modulator 1 or Step Modulator 2
 See page 8 for more details

User Interface - Layer Effects

1 Layer FX

Click FX tab to access the Layer Effects

The Layer effects are global to A layers and B layers

2 Wave Shaper

- » **Power**  - Enable/disable the effect
- » **IN** - Set the input gain
- » **Out** - Set the output gain
- » **Mode** - Set the waveform of the effect
- » **Amount** - Set the effect amount
- » **Mix** - Set the effect dry/wet balance

3 Flanger

- » **Power**  - Enable/disable the effect
- » **Frequency** - Set the modulation speed
Host Sync off - Set the speed at Hz
Host Sync on - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Delay** - Set the delay time of the effect
- » **Feedback** - Set the feedback amount
- » **Mix** - Set the effect dry/wet balance

4 Phaser

- » **Power**  - Enable/disable the effect
- » **Frequency** - Set the modulation speed
Host Sync off - Set the speed at Hz
Host Sync on - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host [DAW project] tempo
- » **Order** - Set the phase shift order
- » **Feedback** - Set the feedback amount
- » **Mix** - Set the effect dry/wet balance

5 Equalizer

- » **Power**  - Enable/disable the effect
- » **High** - Set the high frequency band gain
- » **Mid** - Set the middle frequency band gain
- » **Low** - Set the low frequency band gain
- » **Crossover Frequency** *f* - Set the frequency between low and middle bands, and between middle and high bands

6 Send FX

- » **Power**  - Enable/disable the send per effect, Sparkverb, Convolution, Delay and Feedback
- » **Send Level** - Set the send level per effect

7 Layer Modulators

Click the label at the left to switch the layer Modulators, between LFO 1, LFO 2, Step Modulator 1 or Step Modulator 2

See page 8 for more details

User Interface - Modulation Edit

1 LFO A

Click LFO A label (left) to access the modulator

- » **Power**  - Activate the modulation
- » **Shape** - Dial to select the modulation shape
- » **Frequency** - Adjust the modulation speed
Host Sync off - Set the speed at Hz
Host Sync on - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Host Sync**  - Enable/disable the modulation speed sync to host (DAW project) tempo
- » **Phase** - Adjust the LFO start phase
- » **Delay** - Set the onset delay time of the LFO
- » **Rise** - Set the rise time of the LFO amount
- » **Depth** - Set the modulation depth amount
- » **Mode** - Set the voice mode between Legato and Retrigger

2 LFO B

Click LFO B label (left) to access the modulator

- » **Power**  , **Frequency**, **Host Sync**  , **Mode** and **Depth** - See LFO A
- » **Shape**  - Click to choose the shape from menu

- » **Humanize** - Adjust the randomize amount
- » **Smooth** - Adjust the smoothing amount
- » **Invert**  - invert the LFO phase

3 Step Modulator

Click Step A or Step B label (left) to access each step modulator

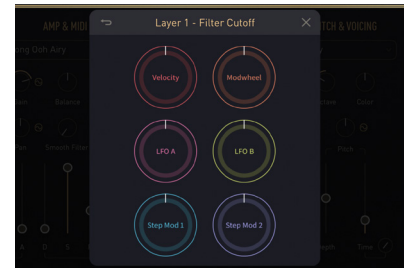

- » **Power**  , **Frequency**, **Host Sync**  , and **Mode** - See LFO A
- » **Step Editor** - Click-drag to set the modulation amount per step
- » **Shift** - Shift steps left or right by using the [] [] arrows found on the sides of the Step Editor
- » **Step Pattern Menu**  - Click to open the Step Pattern Panel to select a preset pattern

- » **Bipolar** - Enable/disable Bipolar mode
- » **Smooth** - Click to smooth the transition between steps
- » **Invert** - invert the modulation pattern
- » **Clear** - Initialize the pattern
- » **Steps** - Set the number of steps
- » **Speed** - Adjust the modulation speed
Host Sync off - Set the speed at Hz
Host Sync on - Set the speed at musical units such as 1/4, 1/8 dots, 1/16 triplet and so on
- » **Smooth** - Adjust the overlap between steps

4 Open Modulation Panel

At the right of modulatable parameters, click the  button to open the Modulation Panel

Click the  button to undo edits

Click the [X] button to close the panel

User Interface - Arpeggiator Edit

1 ▶ Arpeggiator

Click A or B tab to select the Arpeggiator to edit

- » **Power**  - Enable/disable the Arpeggiator
- » **Mode** - Click to set the arpeggiator mode: Arpeggiator, or Phraser
- » **Octave Low/High** - Lock the sequence in a specific octave range, with lowest and highest octave [Phraser mode only]
- » **Motion** - Click to set the arpeggiator motion as played, up, down, or up+down [Arp mode only]
- » **Speed** - Set the step duration
- » **Steps** - Set the number of steps
- » **Octave** - Set the octave range of the arpeggiation
- » **Step Editor**
 - Vel** - Click-drag to set the velocity
 - Link** - Enable to sustain the previous step
 - Mode** - Set the step type (Basic, Harmonized or Chord) based on mode
 - Pitch** - Set a pitch offset in semitones
 - Octave** - Set a pitch offset in octaves
 - Gate** - Set the step gate duration
 - Pan** - Set the step pan
 - Menus**  - Click the  button to right side of each row to either initialize, randomize, or select a preset.

2 ▶ Preset

- » **Preset** - Change presets by drop-down menu or by using the [] [] arrows

3 ▶ Chord Detector

- » **Chord** - Indicates the chord type detected from current incoming MIDI notes

4 ▶ Shift

- » **Shift** - Shift a step ahead or behind by using the [] [] arrows at both side of the Step Editor

5 ▶ Dual

- » **Dual** - Enable/disable the dual arpeggiator mode, Arp B uses Arp A arpeggiation

User Interface - FX

1 Send FX

- » **Sparkverb**
Power  - Enable/disable the effect
Size - Set the reverb room size
Decay - Set the reverb decay time
High/Low - Multiplies the decay time [-/+] for the high and low frequencies
Gain - Set the output gain of the effect
- » **Convolution**
Power  - Enable/disable the effect
IR - Select an IR by drop-down menu or by using the [] [] arrows
Time - Set the reverb time
PreDelay - Set the time before reverb starts
Width - Adjust the stereo width of the reverb from mono to wide stereo
Gain - Set the output gain of the effect
- » **Dual Delay**
Power  - Enable/disable the effect
Time - Set the delay time
Feedback - Set the delay feedback amount
High/Low Cut - Set the delay output's High-Cut and Low-Cut filter frequencies
In/Out Width - Adjust the stereo width of the effect at input stage and output stage
Gain - Set the output gain of the effect
- » **Feedback Machine**
Power  - Enable/disable the effect
Comb - Set the comb filter amount
BP Cutoff - Set the cutoff filter frequency of the band-pass filter
Gain - Set the output gain of the effect

2 Bus FX

- » **Drive**
Power  - Enable/disable the effect
Amount - Set the drive amount
Tone - Adjust the brightness of the effect [Lowpass filter frequency]
Gain - Set the output gain of the effect
- » **Equalizer**
Power  - Enable/disable the effect
Gain - [High/Mid/Low] Set the gain amount [+/-] for each band
Mid f - Set the frequency of the Mid band
- » **Maximizer**
Power  - Enable/disable the effect
Threshold - Set the input level at which limiting will begin
